**margintomargin: WOMEN LIVING ON THE EDGES OF THE WORLD** *naisia maailman laidalla*

An international research project and artistic collaboration between various global artist communities the exhibition had a goal to study how art empowers women living in marginal conditions in Finland, Russia and Australia. 46 women converged on Fowlers Bay in October 2016 for a 7 day cultural exchange which created many of the traditional weaving, felting and painting artworks. Created by individual artists and collaborations the work is supported by a vast spectrum of video artworks, video documentation of artistic processes and photography artworks and; features work from Rovaniemi (Lapland, Finland), Port Augusta and the Far west communities of South Australia.

**margintomargin: PIECE OF HEAVEN** *pala taivasta*

The exhibition was a collaborative textile installation where groups of artists visualized and discussed their experiences of happiness. Piece of Heaven—*pala taivasta* describes the feeling when everything is good, in harmony, as good as it gets. Piece of Heaven is a textile installation where each piece is created in different parts of the world: in Streaky Bay, South Australia, in Windhoek Namibia, in Rovaniemi Finland and; in Murmansk Russia.
